

Alaska Fuel Costs Increase

September 11, 2009

Dear Valued Customer,

As the cost of bunker fuel continues to fluctuate, the water carriers that serve Alaska need to pass through the fuel costs as reflected within the rest of the transportation industry. Fuel is a major portion of the carrier's cost of doing business and they are susceptible to fluctuating fuel prices, which they monitor closely, to keep the impact minimized to the shipping public. The current surcharges are as follows;

- Anchorage, Fairbanks, Kenai, Homer, etc via Horizon ship 20.5%. Effective 8/30/09
- Anchorage via Tote ship 23.5%. Effective 9/20/09

We will continue to closely monitor fuel costs and will adjust the Fuel Surcharge as trends warrant.

We appreciate your continued support.

Sincerely,

Royal Global Express
